+Appointed December 21, 1925, in place of Charles E. Davis, resigned.

Report of the Mayor

To the Citizens of Rutland:—

I hereby submit, for your consideration, my seventh annual report as Mayor of the City of Rutland for the year ending December 31, 1925.

If you read carefully the report of our Treasurer as to how the money has been expended, you will see that we have not only lived within our means, but have made a big gain financially in all departments. Our Treasurer's report shows as big if not a bigger balance in the various departments than in any one year since Rutland has been a city.

Again, through the efforts of the City Treasurer, we were able to issue the \$45,000.00 street improvement, sewer and sidewalk bonds at 4¼%, as well as receiving a premium of \$1,411.50 on these bonds.

As will be shown by the report of the Commissioner of Public Works, we have done as much if not more work this past year than any year since I have been Mayor. After doing all this, as will be shown in the Treasurer's report, we have a cash balance on hand of \$37,422.75. Of this amount, \$3,597 92 was saved from this year's bond account and will be available for next year's work.

I have referred to the financial gain that has been made this last year and, for you information, not to go back of the first year of my own administration, I wish to submit the following figures for your consideration just to prove some statements that have been made by the outsider.

		Made up Net Cash Accounts as follows:
Year 1919—Cash on hand	\$26,732 27	General .. \$11,385 59 Water ... 12,156 09 Other depts. 3,190 59
Year 1920—Cash on hand	\$62,747 91	
Less money in bond acct.	48,722 42	14,025 49—General .. \$7,610 73 Water ... 4,371 45 Other depts. 2,043 31
Year 1921—Cash on hand	\$15,472 26	
Less money in bond acct.	4,767 62	10,704 64—General .. \$8,601 17 Other depts. 2,103 47
Year 1922—Cash on hand	\$27,045 54	
Less money in bond acct.	10,597 91	16,447 63—General .. \$3,977 22 Water ... 3,487 58 Other depts. 8,982 83
Year 1923—Cash on hand	13,409 99	General .. \$1,389 72 Water ... 2,624 10 Other depts. 9,396 17
Year 1924—Cash on hand	\$37,512 07	
Less money in bond acct.	21,098 78	16,413 29—General .. \$3,015 39 Water ... 8,980 37 Other depts. 4,417 53
Year 1925—Cash on hand	\$37,422 75	
Less money in bond acct	3,597 92	33,824 83—General .. \$15,784 80 Water ... 15,317 62 Other depts. 2,722 41

While there was issued this last year \$45,000.00 in new bonds, through the payments of bonds and sinking fund earnings, our bonded debt was only increased \$10,679.53, as shown from the following figures taken from the report of the Treasurer.

This is made up as follows:

Street improvement bonds	\$30,000 00
Sewer bonds	10,000 00
Sidewalk bonds	5,000 00
	<u>\$45,000 00</u>

General appropriation to sinking fund	\$12,000 00
School bonds Nos. 589-590 paid from general account	2,000 00
Street improvement bonds Nos. 648-657 paid from general account	10,000 00
Sinking fund earnings	10,320 47
	<u>34,320 47</u>
	\$10,679 53
Total bonded debt	\$705,000 00
Less sinking fund, water	\$61,216 06
Less sinking fund, general	178,450 10
	<u>239,666 16</u>
Net debt of city December 31, 1925	\$465,333 84
Net debt of city, December 31, 1924	454,654 31
	<u>\$10,679 53</u>

The above \$10,000.00 paid for bonds Nos. 589-590 for street improvements, paid from the general account, pays the balance of our first \$50,000.00 bond issue, this all having been paid from taxes.

Sinking fund commissioners have paid bonds to the amount of \$37,000.00 this last year.

Our tax rate was reduced from \$3.35 in 1924 to \$3.10 in 1925, and a good many people think this is altogether too high, but if you can tell us how you are going to support your schools, build roads, sewers and sidewalks as well as other improvements, all of which cost money, without taxation, we would like to know it, as we have tried our best to expend the people's money and keep the taxes as low as it was possible to do.

The finances of our city are in most excellent shape. With all our bond issues, it has not affected our rating and I am proud of the report as shown by the Treasurer.

DEPARTMENT OF PUBLIC WORKS

Again this department, under the supervision of Joseph P. Feeley, has accomplished a great amount of work, and, if you will compare the costs with other cities, you will find the costs to be considerably less, due to his management and organization.

This department covers a wide field of city activities, and its problems are not easily solved. This department would like to do a lot more than it does, but cannot do everything with the money that is available. If every taxpayer would read carefully the report of the Commissioner of Public Works, as printed in full in the city report, there would not be quite so much fault found with Commissioner Feeley and the Mayor. There is not one cent of the people's money spent in this department, that is not accounted for and shown on the books of this department, as well as keeping a close check of all material received and dispersed. The books and records are open to the public at any or all times.

I will not go into the details of the work in this department, as this will be shown in Mr. Feeley's report. However, I would like to mention some of the important work that has been accomplished this past year.

The River Street viaduct over the railroad was completed this summer and the total cost, being \$57,483.71, was under our estimate of \$65,000.00. The itemized figures are shown in the report. One-half of this amount was paid for by the railroads.

Some of the other accomplishments were:

Street improvement work from bond issue.

Cement concrete road on Evelyn and Freight Streets.

Cement concrete road on Curtis Avenue.

Cement concrete road on North and South Main Streets between the abandoned car tracks.

Kentucky rock asphalt road on Church Street from West to Crescent Street.

Kentucky rock asphalt road on East Center Street from Main to East Street.

I ask you to compare the figures shown in detail of the above work with contract figures.

The Holt tractor and snow plow attachment purchased last January, I feel was one of the best investments this city ever made and I think the people have been well pleased with the results. The new Adams grader purchased this last year has

proven well worth the money, used in connection with the tractor.

We have constructed this last year at quite a saving to the people, several square yards of cement concrete sidewalks and this work has been most satisfactory to the property owners.

We have done a lot of sewer work this past year, the biggest job being on Pine Street, under the tunnel, this work being still in process of construction. This was quite an undertaking and men in charge are to be complimented for this fine piece of work, that is being done under the worst of conditions.

The construction now going on of a cement concrete building for our power house at the stone-crushing plant on Pine Hill, was something that was very much needed for the protection of the valuable machinery at this place, and, when completed, will be a credit to our city.

WATER DEPARTMENT

This department has been well looked after under the supervision of Francis Tracy. Several new hydrants have been installed, new mains put in and others extended; new services on streets where permanent improvements have been made.

There were set out last year on the watershed 35,000 spruce and pine trees. A survey of the complete water system has been completed and the details of the pipe lines, reservoirs, etc., are given in the report of the Commissioner of Public Works.

DEPARTMENT OF PUBLIC SAFETY

This department has been well looked after under the direction of Commissioner Fred C. Roberts.

FIRE DEPARTMENT

This department has been most efficiently and economically administered under Chief A. H. Koltonski and his assistants.

It was very disappointing to the members of this department, and to me, that the proposition for the purchase of a new Motor-Driven Aerial Ladder Truck was turned down by the Honorable Board of Aldermen. I trust that this matter will be reconsidered in the near future, as a department that is giving

such service and satisfaction is deserving of the apparatus that its needs require.

POLICE DEPARTMENT

I feel that this department never has been any more efficient than it is at the present time, under the supervision of Chief Roy H. Leonard, a uniformed chief. He and the men under him have done very efficient work.

I want to say that I am very proud of these departments. I heartily agree with the vote of the Honorable Board of Aldermen for the purchase of a Patrol wagon in place of another motorcycle.

DEPARTMENT OF CHARITIES AND CORRECTIONS

Again this department has been very well managed under the supervision of Mr. and Mrs. Hickey. This department is continually being confronted with numerous problems that are hard to solve, and with the high cost of everything, they make good use of the appropriation.

MEMORIAL HALL

The appropriation to the Library was increased from \$4,500.00 to \$5,500.00 this last year and the increase was very much needed and appreciated by the ladies in charge of this association. This gives them only just about money enough to meet their expenses.

CONCLUSION

In conclusion, I want to express my sincere appreciation to the Board of Aldermen, who have been associated with me this last year in the administration of city affairs.

To the City Treasurer, City Clerk, Commissioner of Public Works and Public Safety, to the heads and foremen of the different departments, as well as to the men under them, because of the co-operation which has existed between the different departments, we have the results as shown in the reports.

Respectfully submitted,

JAMES C. DUNN, Mayor.

Report of the City Treasurer

To the Honorable City Council:

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1925:

RECEIPTS

Respectfully submitted,

CHARLES H. LANDON,
HENRY F. FIELD,
CHARLES M. SMITH,
Sinking Fund Commissioners.

Report of the Commissioner of Public Works

To the Honorable City Council:

Gentlemen:—In accordance with the provisions of the City Charter, I submit the annual report of the Commissioner of Public Works, for the year ending December 31, 1925.

ORGANIZATION OF THE PUBLIC WORKS DEPARTMENT

Office Force:

R. H. Royce, Engineer
F. L. Rice, Assistant Engineer
J. H. Davies, Clerk

Maintenance and Construction Force:

Superintendent of Water, Frank Tracy
General Foreman, James McLaughlin
Foreman at Crushing Plant, Patrick Capeless
Foreman of Bridges and Buildings, John Connors
Foreman on 57-in. trunk sewer, Joseph Stacey
Foreman of Bond Issue construction, Joseph Stacey
Foreman of Bond Issue construction, Leslie Gray
Foreman of Bond Issue sidewalk construction, Jack Howard, Jr.

The Department of Public Works surveyed, designed and supervised the construction of all work completed under the paving bonds issued for 1925, and furnished the maintenance of all work completed under the bonds issued in 1920, 1921, 1922, 1923, 1924 and 1925. This maintenance consisted of cleaning and filling all joints and shrinkage cracks with a bituminous filler.

Evelyn and Freight Streets were paved with cement concrete, 7-in. uniform thickness, reinforced with No. 45 mesh. These two streets were in an almost impassable condition and contained no drainage system. A complete system of drainage was installed, including a 15-in. sewer connecting an overflow at the junction of Merchants Row and Evelyn Street and outfalling into the 54-in. sewer in West Street. Numerous catch-basins and manholes were constructed.

Due to the amount of traffic on Evelyn and Freight Streets it was deemed advisable to construct the pavement in two sections, allowing the first section to cure 14 days before grading was started on the other section.

Lumnite cement was used in front of all the entrances requiring same, thereby allowing the business houses uninterrupted service after 24 hours.

Conduit was laid underground at the junction of Freight and Evelyn Streets and also from a point in front of the Clement Bank, to a point along the south curb at the corner of Evelyn and Merchants Row.

Work on this project was begun April 6, 1925, and completed June 10, 1925, a total of 15 working days.

Rainy weather caused a great amount of inconvenience and during the construction season from May 15, 1925, to November 15, 1925, we experienced 49 rainy days.

Another important outlet paved was Curtis Avenue. This section carries a heavy traffic and, due to the nature of the soil, which consists of a sand clay with a large amount of ground water, it was nearly impassable after a rain storm of short duration. The Rutland Fire Clay Company was responsible for 50% of the total cost.

This street also presented a drainage problem and 5 catch-basins and 4 manholes were built and the 8-in. sewer flushed and all sediment removed.

The type of pavement constructed was cement concrete, 7-in. uniform thickness, 12 feet in width and reinforced with

No. 45 mesh. Work was started April 29, 1925, and completed June 29, 1925, a total of 23 working days.

It is with deep regret that I report the loss of one of our young men, Raphael Pippin, who was electrocuted on this job by a broken high tension wire owned by the Rutland Railway, Light & Power Company. The Rutland Herald of June 17, 1925, carries a complete story of the accident.

The next paving project was on North and South Main Streets, in the car track area and the intersection at Main Street and Woodstock Avenue, Main Street and Temple Street and Main and North Streets. This work was stopped for a time due to deliberations by the Board of Aldermen as to the advisability of using that section as a park way, but following an investigation of the situation work was ordered to be resumed as originally laid out.

The car track area was paved with cement concrete 6 inches thick and the intersections with cement concrete 7 inches thick, reinforced with No. 45 mesh.

Work was started June 16, 1925, and completed October 23, 1925, a total of 34 working days.

Woodstock Avenue was paved with Kentucky rock asphalt throughout its entire length with the exception of the intersection at North Main Street, which was paved with cement concrete.

Tests were made along the surface of the old roadway every fifty feet to determine the depth of the wearing surface and it was found that the old water-bound and gravel surface varied from 8 to 12 inches throughout. The surface was very rough, full of pot holes and very unsatisfactorily graded. The old surface was scarified, graded and new metal was added where required to bring the old base to a proper line and grade. On this base was placed the asphalt wearing course, $2\frac{1}{4}$ inches thick, which was properly rolled, and a bituminous shoulder of crushed stone one foot in width was constructed throughout the total length of the job. Due to traffic conditions, that section between the Stratton Road and the City line was constructed

in two 10-foot sections and a flag system of directing traffic was installed, whereby no vehicle was detained more than seven minutes at either end.

This asphalt wearing surface will protect the old roadbed, which serves as the foundation, from the impact of traffic, and, due to its flexibility, is itself highly resistant to impact. It is quickly and easily repaired and may be used over and over again and it never loses its original compactness. It transforms the original macadam and gravel road to a high type of pavement with a minimum of labor and expense, and with the least possible interference with traffic during the resurfacing work; in fact, it may be opened to traffic two hours after the final rolling.

Certain sections of sewer had to be constructed and 15 catch-basins and 3 manholes installed to improve the drainage system. All water services were investigated and relaid where required.

Construction work was started May 8, 1925, and completed July 24, 1925, a total of 76 working days.

Another Kentucky rock asphalt project was Church Street. More complaints were received about this street than any other in the City proper. The old roadway consisted of water-bound macadam on a telford base and was in a deplorable condition due to inadequate drainage. Surface water stood in the gutters until removed by evaporation or percolation.

This old surface was scarified and reshaped, new metal added, and $2\frac{1}{4}$ inches of rock asphalt placed thereon.

Nine new catch-basins were installed and the old basins rebuilt. A bituminous shoulder one foot in width was constructed and all intersections crowned to meet future developments.

The car track area on State Street composed of bituminous macadam was reinforced with asphalt, due to the discontinuance of the street cars. The asphalt wearing surface varies in thickness from $\frac{1}{2}$ inch at the concrete to $1\frac{1}{2}$ inches and greater in the bituminous section.

The project is purely experimental, and before laying the asphalt, this office consulted with numerous engineers to receive the benefit of their experiences, and although not much information on resurfacing of abandoned car track areas was available, yet from all indications, after five months of traffic, the surface shows no sign of fatigue, and seems to improve under heavy traffic.

EAST CENTER STREET

This project was authorized by your Honorable Board. The property owners paid one-third of the total cost which was collected before construction was begun. This pavement consists of an integral curb and gutter with a 20-foot asphalt surface laid on the old water-bound base. The old base was scarified, re-shaped, new metal added and the entire surface water-bound and rolled. New catch-basins were built and the drainage system improved. Some water services were relaid and others examined for leaks. This job also included cement concrete sidewalks on both the north and south sides of the street. The sidewalks were charged direct to the sidewalk account. A small section of bituminous macadam was laid on River Street just west of the River Street viaduct and on the adjoining section of Post Street.

Tabulation of the asphalt, bituminous and cement concrete paving is as follows:

Temple Street, cement concrete	\$363 96
Woodstock Avenue, cement concrete	943 44
North Street, cement concrete	922 58
North and South Main Streets, cement concrete	6,383 84
Evelyn and Freight Streets, cement concrete	6,309 19
Curtis Avenue, cement concrete	3,959 60
State Street car track area, rock asphalt	3,276 50
East Center Street, rock asphalt	3,324 33
Woodstock Avenue, rock asphalt	24,010 05
Church Street, rock asphalt	9,992 24
River and Post Streets, bituminous macadam	537 24
Total	\$60,022 97

The total amount of paving under the bond issues is as follows:

CEMENT CONCRETE

Year	Constructed by	Sq. yds.	Cost	Per sq. yd.
1920	Contract	11,340	\$50,013 71	\$4 42
1921	Contract	11,991	43,274 32	3 62
1921	Public Works Dept.	1,824	3,677 32	2 015
1922	Public Works Dept.	21,384	41,429 65	1 93
1923	Public Works Dept.	24,100	51,848 86	2 15
1923	Public Works Dept.	2,733	6,182 63	2 23
1924	Public Works Dept.	15,574	31,471 35	2 02
1925	Public Works Dept.	8,199	18,882 61	2 30
		97,145	\$246,869 45	

ROCK ASPHALT

1924	Public Works Dept.	2,482	\$3,350 00	\$1 309
1925	Public Works Dept.	23,675	40,603 12	1 715
		26,157	\$43,953 12	

BITUMINOUS MACADAM

1924	Public Works Dept.	2,400	\$3,371 83	\$1 40
1925	Public Works Dept.	555	537 24	0 968
		2,955	\$3,909 07	

We have on hand at the Post Street Yard 300 feet joint filler at \$0.143 per foot—\$42.90.

The sum of \$23,597.92 is available for work during 1926, accumulated from the saving on past issues of street improvement bonds.

STREET DEPARTMENT

A five-ton Holt tractor was purchased last January; also a Sargent snow plow suitable for the removal of snow from our highways during severe storms. The results of the snow removal program were most pleasing to the citizens, and this office has

accurate cost data on the removal of snow, both from the business section and the outlying districts. We gained considerable experience in snow removal and hope to be able to improve on our methods of the past year. Approximately sixty miles of highways have to be plowed in addition to our sidewalk work.

Graveling dirt roads was continued during the winter season and the results were gratifying. This type of construction is approved by nearly all. Our costs averaged about the same as during 1924.

The five-ton Holt was used with the new Adams grader purchased in the spring, to shape and scrape the highways requiring same. This equipment has paid for itself and it is remarkable how little effort is required to do the work, that formerly required three pairs of horses. We also used the tractor and grader on all the bond issue work and saved considerable over the hand method, both in speed and money.

The patrol system was continued, waterbound and oiled gravel streets patched and maintained with a cold patch furnished by the Standard Oil Company.

Standard No. 5 cold application was applied to all streets that required treatment. This application was covered with sand immediately after applying and only one oiling was necessary. The cost of the No. 5 road oil was increased over last year; in fact, there has been a steady increase since 1920, and the cost of the road oil has just about doubled.

A communication was submitted to your Honorable Board relative to an improvement in the distribution of the costs of oiling. The system now in vogue meets with disapproval by the majority of the taxpayers.

To better inform your Honorable Board relative to the condition of the streets in this City, a survey of improved and unimproved streets has been made and sub-divided as follows:

First class streets include those paved with asphalt, brick, bituminous macadam, concrete or wood block.

Second class streets include those having telford or stone base, with water-bound macadam or gravel wearing surface, suitable for oil application.

Third class streets include those having cinder or dirt roadways, but no stone or gravel base.

Fourth class streets include those upon which property is taxed, but which have never been worked nor formally accepted as streets.

First class	9.27 miles, or	16.63 per cent
Second class	19.75 miles, or	35.36 per cent
Third class	24.93 miles, or	44.66 per cent
Fourth class	1.87 miles, or	3.35 per cent
		<hr/>
		55.80 miles, or 100.00 per cent

This data is to the close of the fiscal year ending December 31, 1925.

From a study of the conditions enumerated above you can readily see that your street problem is still acute. With a total mileage of 55.8 miles and only 16.63 per cent or 9.27 miles improved you still have approximately 46 miles of paving to complete. In connection with the improved type of highway, maintenance has to be considered, this cost increasing with the life of the pavement. Then again, the motor vehicle demands more and better pavements, and requires that the pavement be serviceable twelve months of the year. When you have 15 miles of paved streets completed you will need more equipment for snow removal, and an automatic street cleaner for summer cleaning, but until such time I consider it economy to proceed with the equipment now on hand.

Your constituency should be more fully informed as to existing conditions, monies available for the different type of construction, such as sidewalks, sewers, bridges and streets, and if they desire further improvements, ways and means should be devised by your Board for such improvements.

It should be borne in mind that excessive overloading of motor trucks has brought about new traffic conditions, which are

showing their effects, not only on our dirt and gravel highways but on our so-called permanent ones.

Water sprinkling was continued in the business section as heretofore and applied with the horse-drawn flusher.

Very little calcium chloride was applied during the season. The small amount applied was purchased in 1924.

An agreement was made with the Rutland Railway, Light & Power Company to remove their tracks, ties, poles, and overhead wires from the streets of Rutland at their own expense, and also pay the City of Rutland \$6,000.00.

RAILROAD AND TROLLEY CROSSINGS

At Evergreen Cemetery in the car track area, was constructed a section of cement concrete using Lumnite cement. This area was open to traffic 24 hours after pouring the concrete.

On South Main Street at Park Street, the railroad and trolley crossings were resurfaced with Kentucky rock asphalt. The Rutland Railroad Company reimbursed the City of Rutland for one-half the cost of resurfacing their track area.

SIDEWALKS

Petitions for cement concrete sidewalks were received in large numbers and this type of construction is very popular. A construction force was busy on this work from May 1, 1925, to November 4, 1925, and even then we could not begin to fill all the orders on file in this office. The same procedure is followed as in the past relative to cost sheets, estimated amount and frontages.

Snow was removed from the sidewalks by horse-drawn plows and necessary sand spread when required.

SEWERS

The design as planned in 1923 has been carried on throughout the past year at odd times, and the system will be completed and plans filed in the City Engineer's Office not later than March, 1926. This design will show in each street, the size of

sewer, depth of sewer, discharge, and velocity throughout the whole city. Your sewer committee should show enough interest to see that this plan is strictly adhered to in the future development of your sewer system, thereby eliminating the costly and disagreeable features of removing a small unit of service for the replacement by the proper size drain.

The system proposed for that section east of Lincoln Boulevard along Tenney Brook and extending north and south on North Main Street has been completed with proper manholes. At the east end of the Lincoln Boulevard culvert an under-water receiving basin of concrete was constructed, to trap the flow of sewage from the east, north and south. Short laterals were extended on the east line of Lincoln Boulevard running north and south to meet future developments and eliminate the necessity of again damming that section of Tenney Brook, to make connection with the branch sewer running east and west.

On Bellevue Avenue we constructed a sewer line to meet the development in that section. The data for this section was taken from the "Plan of Proposed Sewer System." This sewer extended northerly along Bellevue Avenue 200 lineal feet, and westerly on High Street 100 lineal feet.

A section of new sewer was laid on Curtis Avenue extending easterly from Horton Street, and the old sewer line was cleaned, manholes and catch-basins were constructed. This construction was necessary as no manholes were built when this system was first installed. With the addition of these manholes it will be possible to inspect the sewer at frequent intervals.

A complete sewer and drainage system was installed in Evelyn and Freight Streets, and prior to the construction of the cement concrete pavement, this section was without a sewer of any type. The buildings were connected by long laterals to nearby sewers on private property.

Beginning at the 54-in. trunk sewer on West Street at the corner of Freight Street, a 15-in. akron tile pipe was laid to a manhole at the intersection of Freight and Evelyn Streets, thence easterly to a manhole at the corner of Merchants Row and Eve-

lyn Street. This manhole connects an overflow pipe from the Merchants Row sewer at the corner of Center Street, thereby relieving the load of the Merchants Row sewer during heavy storms.

A short piece of sewer was laid on Harrington Avenue, and the line, grade, and size taken from the "Plan of Proposed Sewer System."

That section of South Main Street park, on the west side between Washington Street and the residence of E. R. Morse was in deplorable condition due to inadequate drainage facilities. A petition was received from the residents of this street to remedy these conditions and following the approval of this petition by your Honorable Board, a survey was made and a 12-in. akron tile pipe sewer was installed to drain into the lateral sewer on the east side of South Main Street. Manhole and catch-basins were constructed along the line of sewer.

Vernon Street sewer between Grove and Pearl Streets was constructed. The petition for this sewer was one of the oldest on file, but due to the rock cut necessary, this job had been postponed yearly. This work was made possible with the aid of our portable air compressor, which expedited the work of removing 200 yards of ledge. Due to the nature of the soil and the deep cut, considerable water and cobble heads were encountered, making it necessary to sheath the ditch for over half the distance. A manhole was constructed at the point of beginning in Pearl Street, two more between that point and Grove Street, and another on Grove Street with stubs running north and south on Grove Street for proposed branches.

During the resurfacing of Woodstock Avenue, it developed that that section between Ross Street and Porter Street was without sewer facilities. It was deemed advisable to construct this sewer before laying the asphalt top. Three manholes were built and the necessary catch-basins installed.

Short sections of new sewer were laid in Engrem Avenue and West Street.

A tunnel 4 ft. 6 in. x 6 ft. 0 in. was driven under the concrete paving on West Street at the junction of the Kissane Place. This was necessary to provide a sewer for the residents of this section.

PINE STREET SEWER

Your sewer committee deserves a vote of thanks for their interest and tenacity in submitting this project to your Honorable Board, and receiving the appropriation necessary to proceed with that portion of the sewer now under construction.

This sewer problem was investigated from all angles with regard to cost and durability. Segment block was considered but due to the small amount of cover over the arch it was rejected. Cast concrete pipe was also considered, and prices were received and tabulated. Monolithic concrete was investigated and an estimate prepared. This estimate was compared with the other types and showed a small saving per foot of sewer, due to the ease of manipulation with the present equipment on hand in the Public Works Department, and this type of construction was finally determined on.

The sewer is 57 inches in internal diameter with a 10-in. arch thickness, 12-in. sidewalls, thickened to 24 inches at the haunches, with an 8-in. invert, also thickened just below the springing line. The sewer ditch was excavated 6 inches below grade and a layer of clean coarse gravel placed before any forms were set.

The ground consists of a 36-in. strata of fine sand, 48 inches of heavy clay and for the remaining depth fine running water sand, with some pockets of quick sand. Ground water is encountered about 48 inches above grade and it requires continuous pumping to keep the ditch free from water.

Semi-circular wooden forms were designed 6 feet in length 2 inches above the springing line of the sewer. These forms are hinged and have turnbuckles attached to allow for adjustments and proper alignment of the section. Complete drawings of the forms, sections, construction details for erecting same, instructions for pouring the sewer, and both arch and invert are on

file in the City Engineer's Office, with plan and profile of sewer line.

The trunk sewer along Baxter Street is in the same condition as my report of 1924 and the same recommendations govern the situation.

REPORT OF THE ENGINEERING DEPARTMENT

This department prepared detailed plans and estimates for the work accomplished this year by the Department of Public Works, which included the concrete power house at the rock crusher; the 57-in. concrete sewer in Pine Street; the paving with concrete of Curtis Avenue, Freight Street, Evelyn Street and the car track area on North and South Main Streets.

A detail survey of Woodstock Avenue, East Center Street and Church Street was made in connection with the paving of these streets with rock asphalt.

All sewers were laid to line and grade as were the concrete sidewalks. In this connection it might be well to state that many of the streets have no established line nor grade; that walks have in previous years been built in short sections having no regard for the ultimate appearance of the street and as a result it is difficult to salvage these old walks and still maintain any uniformity with the crown of the road, the gutter and the curb lines and the adjacent properties.

It would be money well spent to have these streets surveyed and establish legally a reasonable line and grade that may be worked to, in improving any section of the street.

Many sewers, the location of which was unknown, have been uncovered and mapped, and considerable work has been done in completing the card index of the location of all valves, hydrants, etc., in the water pipe system.

Line and grade for streets have been given when such information was available in this office.

The usual application of oil and its subsequent compilation of individual bills was done by this department. It is heartily recommended that this procedure of having each owner pay

for the section oiled opposite his premises be done away with, and that the oil be applied to such streets as in the judgment of the Commissioner of Public Works are fit to receive it, and that the cost be met from a general tax. This would expedite the work and reduce the cost.

This department made the survey and prepared the plans for the concrete swimming pool built by the Knights of Columbus and Cairo Temple for the Caverly Preventorium at Pittsford.

The field work was completed for the preparation of the ultimate sewer system for 1950 and the final plans will be ready for use in the early part of 1926.

PARKS

The South Main Street Park was maintained this year as usual. The bandstand was prepared and the necessary work performed by the attendant.

CLEAN-UP WEEK

During June your Honorable Board appropriated funds for this work, and the amount of refuse removed proved it was a wise expenditure.

CITY HALL SIDEWALK

The old sidewalk was in a dangerous condition and numerous complaints were received from the citizens. The new walk consists of cement concrete 4 inches thick, with the exception of four driveways, which were laid 6 inches thick. Two of these four driveways were lumnite cement, one at the fire station and one at the main entrance to our garage.

WEST STREET BRIDGE

This structure required considerable repair work to place it in a serviceable condition. The old 8-in. x 16-in. rockers on the sub-structure were badly decayed, causing a noticeable deflection in the deck. The whole structure was jacked up, the

old timber removed and replaced with yellow pine stringers treated with asphalt paint. Twenty steel rods $\frac{3}{4}$ -in. x 19 ft. were added and the bridge strengthened throughout. Traffic continued uninterrupted over the structure while repairs were being made.

DORR BRIDGE

The deck of this structure was replanked, transverse floor beams repaired and additions to the lattice truss made. There seems to be a continuous settlement at the center pier and the structure will require close inspection during its period of service.

GUARD RAIL

To protect motor vehicles at bridge and culvert sites, 2,549 lineal feet of wooden guard rail were constructed at the most advantageous points.

CITY DUMP

West's disinfectant was used each day and sprayed over the dump by the attendant. Your board authorized the expenditure of \$35.00 for the extermination of rats under the direction of the Commissioner of Public Safety.

POST STREET YARD

Our municipal storage yard at Post Street has functioned this year as in the past for the storage of equipment and supplies.

PINE HILL QUARRY

Our crushing plant located on Pine Hill crushed all the stone required by the different departments throughout the year.

Plans for a reinforced concrete power house were designed and submitted to your Honorable Board for approval. Said plans were accepted and an appropriation made. Work on the power house is 70% complete at the time of this report.

This addition to our plant will prove valuable and protect both the workmen and the equipment from the elements.

The bins are in poor condition and in danger of failure if any great load is thrust upon them. This office will submit a design for proposed reinforced concrete bins at an early date for your approval.

CITY HALL GARAGE

All our motive equipment is housed and repaired in the garage, which has proven a very valuable addition besides eliminating the unsightly wooden stalls that occupied this area previous to the construction of the garage.

NEW STREETS

That section of Engrem Avenue extending 600 feet easterly from East Street was accepted by the Board of Street Commissioners. The property owners granted the City of Rutland a quit-claim deed for the lands in question.

Litchfield Avenue, extending southerly from Temple Street and thence westerly to Ives Avenue, was also accepted by the Board of Street Commissioners. Property owners granted the City of Rutland a quit-claim deed of this parcel of land. Plans, as surveyed by A. C. Grover, are on file in the City Clerk's Office.

STREETS DISCONTINUED

No streets or portions of streets were discontinued.

RIVER STREET VIADUCT

Guniting of the River Street Viaduct was completed and a final statement will be submitted to your Honorable Board, relative to the total cost of the structure, which is slightly under the estimate submitted to your Board during 1924.

The following is a total cost of the viaduct:

Item	Description and Quantity	Sum
1	Excavation rock and wet, 537 cu yds.	\$1,228 42
2	Concrete piers and footings, 575 cu. yds.	5,997 26
3	Concrete reinforced section, 300 cu. yds.	3,213 83
4	Concrete steel section, 129.5 cu. yds.	1,717 31

Item	Description and Quantity	Sum
5	Guard rail, 956 lin. ft.	\$1,430 37
6	Reinforcing steel, 143,071 pounds	6,117 93
7	Forms, 34,082 sq. ft.	8,724 78
8	Structural Steel, 233,383 pounds	12,471 18
9	Razing old structure, 120,000 pounds	1,154 44
10	Wood block paving, 720 sq. yds.	1,566 21
11	Lighting system standards, 6	746 31
12	Drains, 24	251 94
13	Tile, 294 pieces	115 30
14	Watchman, 1	259 88
15	Gunite, 14,866 sq. ft.	7,520 78
16	Rough finishing, 34,082 sq. ft.	735 84
17	Clean up	810 75
18	Engineering in field and supervision	866 25
19	Design of bridge, \$547.47, no charge	
20	Grading	112 75
21	Miscellaneous labor and material	261 83
22	Rental of tractor	53 00
	Rental of big mixer	752 00
	Rental of compressor	650 00
	Rental of trucks	27 00
23	Sidewalk, 1,537.5 sq. ft.	466 81
24	Concrete curb, 217 lin. ft.	231 54
Total cost		\$57,483 71

WORK PERFORMED FOR OTHER DEPARTMENTS

Fire Department

Ashes were removed from the cellar of Fire Station No. 1 during the year. The tractor was loaned on a few occasions and assistance given in removing hose from the scene of the large fires. The doors at Station No. 1 were repaired and put in working order; also a compressor base for a new compressor was installed.

Police Department

Police lanterns were taken care of by the Street Department and a few repairs made on the silent policemen. Gasoline was furnished for the police patrol.

State of Vermont

Examined and repaired with gunite three of the bridges on the State highway between West Rutland and Castleton.

Caverly Preventorium at Pittsford

We constructed a reinforced concrete swimming pool at the Preventorium. This pool was paid for jointly by the Knights of Columbus and Cairo Temple, of Rutland, Vermont.

Playground Association

Surveyed football gridiron, erected backstop at North Street, constructed a shelter house at the School Street playground and supervised the grading of the grounds.

School Department

We constructed a concrete retaining wall at the Lincoln Boulevard schoolhouse.

Town of Morrisville, Vt.

We repaired a disintegrated reinforced concrete surge tank 30 feet in diameter by 20 feet in height, with gunite. This tank is part of the Municipal Lighting Plant of Morrisville, Vt.

Remodeling "The Brown House" (F. D. White)

In accordance with an agreement between F. D. White and the City of Rutland, in connection with the widening of Grove Street, this house was remodeled under the direction of the Public Works Department.

NEW EQUIPMENT

A five-ton Holt tractor was purchased for the Street Department; also one Sargent road plow; one Adams road grader; one second hand 50 H. P. motor for use at the power plant on Pine Hill; one second hand 3 H. P. sewer pump and one second hand Dodge 1½-ton truck.

WATER DEPARTMENT

Six wooden signs, six feet by four feet, were erected on the watershed lands to advertise the municipal forest and Rutland's water supply. Favorable comment has been received relative to their erection.

On Evelyn Street, all the services under the proposed new pavement were relaid and tapped on the new 6-in. main. All services on Willow and Edson Streets were relaid to prepare for a cement concrete pavement.

The Gleason Reservoir was thoroughly cleaned and repaired. The main from this reservoir and the Mendon reservoir was blown free of sediment and all hydrants in the city were thoroughly blown twice during the year. This insures clean water.

Thirty-five thousand spruce and pine trees were set out on the watershed, using all available space left from previous year's settings.

All miscellaneous repairs of hydrants and leaks on mains or valves, etc., were attended to as soon as possible after being detected.

Chlorination of water and Ortho-Tolidine test and the analysis of the city water have been continued as in previous years.

A 1¼-in. sub-main on the south side of East Center Street, between South Main Street and East Street, was discovered and disconnected. Services on the south side of the street that were connected with the sub-main were tapped on the 6-in. line. Those services that had been in use so long that it was considered necessary to replace them were relaid. All this work was completed before the street was resurfaced.

A path 50 feet wide was cut over the 12-in. and 16-in. supply mains through the swamp on the Beebe property. A wild growth of underbrush and small trees had grown up over these mains making their definite location, in some places, impossible.

The general upkeep and improvement of this department has been carried on as in previous years.

The old 4-in. broken main on Evelyn Street that was partly replaced by a 6-in. line in 1924 was completed this year—to a

point near the watering trough at the Depot Park, a total distance of 385 feet in 1925.

The connection of the 6-in. main on Lincoln Avenue, which was started in 1924, was completed, a total distance of 320 feet through a rock ledge.

The 6-in. main on Charles Street was extended a distance of 120 feet to supply new houses on that street. Also, on Deer Street, the 6-in. main was extended 48 feet to supply new houses being built. The 4-in. main on Engrem Avenue was extended with 6-in. pipe a distance of 284 feet. This in part includes replacing a ¾-in. main, one hundred feet in length. On Harrington Avenue the 6-in. main was extended 340 feet. The 3-in. main on Terrill Street, which had never been connected, was joined by a 6-in. pipe through a rock ledge 175 feet in length.

The 6-in. main on Woodstock Avenue east of Temple Street, was extended westerly for a distance of 305 feet and connected with the Temple Street main at the intersection of Temple Street and Woodstock Avenue.

Fifty-two new services were laid and one hundred and thirteen services relaid and repaired.

Six new hydrants were installed, one at the intersection of Charles and Lafayette Streets; one at East Washington Street and Lafayette Street; one at Woodstock Avenue and St. John Street; one on Evelyn Street near the Sawyer Block; and one on Nichols Street near the Hospital.

Six hydrants were reset and repaired.

A survey of the water system was completed showing in detail the pipe lines between the reservoir and the City proper, with elevations of same. Also a complete survey of the reservoir lands, showing the exact location of each reservoir, capacity, etc. All valves were located and charted. The collecting gallery was investigated fully and data is included in the survey. This office is now able to locate on short notice any valve, pipe or other appurtenance which forms part of our water supply system.

During this survey it was disclosed that there was no plan for future development of the water system on file, and it was

deemed advisable to design such plan in detail. A plan of this kind will show at a glance the particular size necessary for each street or section of streets, location of same, with elevations. Such a plan is now on file in the City Engineer's office, entitled, "Plan of the Water System in Rutland for Requirements of 1950."

The city is subdivided into eight areas as follows:

Area No. 1	683 acres.
Area No. 2	600 acres.
Area No. 3	680 acres.
Area No. 4	522 acres.
Area No. 5	663 acres.
Area No. 6	546 acres.
Area No. 7	778 acres.
Area No. 8	700 acres.

The elevation at the reservoir is 810 and the total length of 16-in. pipe from the reservoir to the corner of Bellevue Avenue and Woodstock Avenue is 17,000 lineal feet, with an elevation of 667.4 at this point.

The approximate area of the City is $8\frac{1}{3}$ square miles, or 5,335 acres.

The approximate area of water in City is 100 acres.

The approximate area of land in City is 5,235 acres.

The design assumed the following conditions:

Fire Protection

Number of standard fire streams, 20.

A standard fire stream throws 250 gallons per minute through an inch and one-eighth nozzle. This protection requires 5,000 gallons per minute, and the system should be able to maintain this flow for ten hours' duration of fire.

Domestic Consumption

Assumed 150 gallons per capita in 24 hours, with a total estimated population of 31,000 in 1950.

On the supply pipe lines feeders are located with proposed elevations, size and the required discharge in cubic feet per

second. From the feeder lines are run the street branches, which in all cases should not be less than 6-in. pipe. Dead ends should be eliminated and the system should be circulatory at all points. Valves should be installed at advantageous points throughout the system.

A survey was completed showing the approximate amount of each individual size water main, as tabulated below, and should prove interesting to your Honorable Board.

1,000 lin. feet	16-in. main
14,700 lin. feet	12-in. main
1,830 lin. feet	10-in. main
10,150 lin. feet	8-in. main
136,710 lin. feet	6-in. main
15,150 lin. feet	4-in. main
33,500 lin. feet	3-in. main
11,070 lin. feet	2-in. main
100 lin. feet	$1\frac{1}{2}$ -in. main
900 lin. feet	$1\frac{1}{4}$ -in. main
1,450 lin. feet	1-in. main
100 lin. feet	$\frac{3}{4}$ -in. main

The total length of pipe—all sizes—226,660 feet, or 42.9 miles. All pipe sizes below 6-in. should be replaced with 6-in. pipe or larger except in special cases, whereby the 4-in. mains will supply the required discharge for a number of years before replacement.

Water Sterilization

All water used by the City of Rutland is sterilized by the Wallace & Tiernan Company chlorinator. The question, "Why is the water chlorinated?" is asked numerous times by Rutland's citizens. This question I will endeavor to answer.

The real danger in the pollution of water is from the typhoid carrier. It has come to be recognized as almost criminal knowingly to permit untreated water to be discharged into a water supply, without treating the water supply so as to over-

come the effects of possible pollution. Therefore the water is sterilized to make it safe to drink, to render it harmless, and to make sure that individuals drinking the water will not be exposed to typhoid fever or some similar disease. There are many diseases that can be transmitted by water, and of these typhoid fever, dysentery and cholera are the best known. The germs causing these diseases are found in sewage from patients infected with the sickness. As most refuse is discharged into or is ultimately carried away by water it is easy to see how the water may become polluted. There are many ways of sterilizing water, but the most efficient and least expensive is to chlorinate the water.

When a water is chlorinated, minute quantities of chlorine are added, which absolutely destroy the germs in the water, but do not alter the chemical or physical characteristics of the water in the least. The difference between a water that has been chlorinated and one that has not been so treated, is that in the first case the germs are destroyed, and in the second case they are not.

Liquid chlorine, valuable as it is to protect the health of the citizens, is at the same time so active that it is necessary that it be properly controlled in order to secure its proper application. The apparatus to control the chlorine can be operated by any competent water works attendant, and we secure excellent results at the reservoir station.

The cost of the process of chlorination is insignificant and averages approximately \$1.12 per million gallons to protect our water supply. Our average daily consumption is approximately 2,500,000 gallons, which is sterilized by the addition of 15 pounds of liquid chlorine.

Weir Test

To determine the quantity of water flowing through the chlorination canal at the reservoir, numerous tests were made. The end contraction weir located sixty feet south of the chlorination station was used and the results checked by other formulas.

A weir may be defined as an artificial obstruction in the waterway having a definite configuration and a sheer fall on the downstream side over which the water falls in a sheet. The type of weir used in our tests is known as a broad crested weir, with two end contractions.

The formula used was:

$$q = 3.23 \left(b - \frac{n}{10} H \right) \frac{3}{2}$$

Which shows a flow of 6.94 cubic feet per second. This amount deducted from the spillway flow, which is 3.57 cubic feet per second, say 3.5 cubic feet per second delivered into the distribution system, amounts to 2,268,000 gallons every 24 hours from the Mendon reservoir.

From the Gleason reservoir we have a 3-in. pipe line and a 6-in. pipe line. The exact amount of each size is unknown. For water flow measurements we assume a delivery equal to a 4-in. pipe. The total length of this main is 11,880 feet with a head of 190 feet; using the formula for long pipes:

$$V = \sqrt{\frac{2ghd}{f}}$$

The velocity of flow equals 3.8 feet per second, with a discharge of .33160 cubic foot per second using the following formula:

$$Gm = \frac{D^2 V}{F m}$$

we have a total discharge of 148.3 gallons per minute, or a total delivery of 213,552 gallons per day.

Water to distribution system from Mendon main	2,268,000 gals.
Water to distribution system from Gleason main	213,552 gals.

Total number of gallons from both mains	2,481,552 gals.
---	-----------------

Assuming a population of 16,000, the amount consumed per

capita per day would be 155 gallons, which is an excessive consumption for a city of this size.

Elevation of the Gleason Reservoir is	889.
Elevation of the Mendon Reservoir is	810.
The total capacity of the main Mendon Reservoir is.....	4,138,667 gals.
The total capacity of the upper Mendon Reservoir is.....	162,000 gals.
The total capacity of the lower Mendon Reservoir is	347,000 gals.
The total capacity of the old collecting gallery is	53,853 gals.

The total available capacity at the Head Water Works 4,701,520 gals.

The old collecting gallery is connected to the East Creek by a 12-in. pipe plugged at the creek inlet. In time of emergency, as during a serious fire of long duration, causing a heavy draft on the water supply, this plug to be removed and an auxiliary supply received from the East Creek, of approximately 4,500,000 gallons in 24 hours. During this emergency it would be necessary for the citizens to boil the water supply due to the addition of untreated water from East Creek.

Approximate Yield of Watershed

The drainage area of the Rutland Water Works watershed is approximately 23 square miles, including the Brewer and Eddy Brooks, and to arrive at the available minimum flow, the following deductions were made from data compiled over a period of nine years—from 1917 to 1925, inclusive—and the following figures show the total precipitation during this period.

1917.....	29.57 inches per year
1918.....	36.75 inches per year
1919.....	36.28 inches per year
1920.....	38.97 inches per year
1921.....	28.05 inches per year
1922.....	34.83 inches per year
1923.....	35.63 inches per year
1924.....	32.53 inches per year
1925.....	38.19 inches per year

Total... 310.80 inches for nine years

The average precipitation per year was 34.53 inches for the nine-year period, the heaviest rainfall for one storm was 3.11 inches, and the heaviest rainfall during a given time was 2.8 inches.

A depth of one inch of rainfall over one square mile is equivalent to 2,323,200 cubic feet per square mile per year.

A depth of one inch of rainfall over one square mile is equivalent to 17,378,720 gallons per square mile per year.

A depth of one inch of rainfall over one square mile is equivalent to 47,613 gallons per square mile per day.

The average rainfall during this period was 34.53 per year, and assuming an error of $3\frac{1}{4}\%$ in this average we have:

$34.53 - 34.53 \times .0325$, or 33.41 inches per year. Again, assuming the minimum rainfall to be 60 percent of the average, or $33.41 \times .60$, the result would be 20.25 inches per year, and allowing that 50% of this average rainfall reaches the stream or: $20.25 \times .50$, we have a total minimum yield of 10.13 inches per year.

A depth of one inch over one square mile is equivalent to 47,613 gallons per square mile per day and for 10.13 inches the equivalent is $47,613 \times 10.13$, or 479,320 gallons per square mile per day.

The total minimum yield over the Rutland watershed of 23 square miles equals $479,320 \times 23$, or 11,024,360 gallons per day. The average daily consumption is approximately 2,500,000 gallons per day, proving that Rutland has an ample supply of water for a long period of years.

The following table shows the total precipitation for 1925:

Month	Rainfall	Snowfall	Total Moisture
January	.00 in.	26.64 in.	1.92 in.
February	.77 in.	11.10 in.	2.56 in.
March	3.89 in.	4.40 in.	4.38 in.
April	.38 in.	14.10 in.	2.23 in.
May	2.77 in.	.00 in.	2.23 in.
June	5.41 in.	.00 in.	5.41 in.
July	4.59 in.	.00 in.	4.59 in.

ANNUAL REPORT

August	2.43 in.	.00 in.	2.43 in.
September	5.04 in.	.00 in.	5.04 in.
October	2.38 in.	7.50 in.	2.84 in.
November	2.87 in.	1.40 in.	2.96 in.
December	.59 in.	5.10 in.	1.06 in.
	<u>31.12 in.</u>	<u>70.00 in.</u>	<u>38.19 in.</u>

RECOMMENDATIONS

That all water mains under 6-in. be replaced with proper size pipe, this work to be so classified that a certain portion of small main will be replaced each year.

Enlarge and reconstruct with concrete the storage bins at the Pine Hill Quarry. These bins are in a serious condition, timbers warped, sprung and crushed, due to age and excessive over-loading. I understand from old records that the present bins were installed in 1915.

That ways and means be devised so that at least one mile of permanent paving or a wearing surface of bituminous macadam, asphalt or similar type be constructed each year, thereby utilizing the old roadbeds of gravel and water-bound macadam.

That the center pier and the abutments of the Ripley Bridge be gunited. This sub-structure shows signs of wear, and applying two coats of gunite, will not only strengthen the pier and abutments but will protect them from the elements.

That a survey be prepared showing the relative locations of the Eddy and Brewer Brooks partially located on the City of Rutland lands in the towns of Mendon and Shrewsbury.

This survey to show the feasibility of turning the waters of the Eddy Brook northerly into the Mendon Brook. If this development is possible, it will further increase our water supply during periods of emergency and insure greater delivery to our reservoir whenever an excess supply is required.

The sewer system in Jackson Avenue to be replaced with proper size conduit, as shown on the plan of "Proposed Sewer System" on file in the City Engineer's Office.

That a Venturi meter be installed at the gate house of the reservoir as recommended in the report of 1924.

Survey all street lines as recommended in the report of 1924.

CONCLUSION

In this report I have endeavored to set forth, in brief form, the work accomplished by the Department during the year of 1925, as well as bringing to your attention certain recommendations affecting the future conduct of the Public Works Department.

To the Board of Aldermen I wish to express my sincere appreciation of their splendid and helpful co-operation, which has been shown throughout the past year; and I wish to thank the men who make up the organization for their loyalty and support; also Fire Chief A. H. Koltanski for his valuable services in the problems brought to his attention.

To His Honor, Mayor James C. Dunn, I wish to express my appreciation for the confidence he has shown in me in the administration of the official program and thank him for his helpful counsel.

Respectfully submitted,

JOSEPH P. FEELEY,
Commissioner of Public Works.

Report of Commissioner of Public Safety

To the Honorable City Council:

I herewith submit my report as Commissioner of Public Safety for the year ending December 31, 1925.

FIRE DEPARTMENT

The Fire Department is composed of the Chief Engineer, Assistant Engineer, two Captains, nine regular firemen and eleven call men.

The Chief Engineer, Asst. Engineer, one Captain, six regular firemen, and two call men are located at Station No. 1, and three regular men and a captain at Station No. 2.

The department answered 171 alarms during the year: 131 telephone, 26 bell, 10 still and 4 thermostat calls, a larger number than in any previous year, and our fire loss, \$45,662.00, was very creditable considering the number of fires.

Of the above amount it is estimated that \$32,000, or 72% of this loss, was of a preventable nature.

In the business section the regular weekly inspection by Fire Marshal Koltonski and his assistants has been continued, and our business men are co-operating in every way, and with the realization by the general public of the necessity of eliminating every possible unnecessary fire hazard, the preventable fire loss will be materially reduced.

During the year, the compressor which furnished power for fire alarm had to be replaced at a cost of \$650.00.

Owing to the necessity of purchasing the above very little work was done on our alarm system, and during the coming

year considerable work is necessary in rebuilding part of the system.

The ladder truck, which has been in use by the department for over thirty years, has been very unsatisfactory for a number of years, and has now reached the point where, owing to its age, it is not only inefficient, but is unsafe for use. Necessary equipment is of vital importance where the lives of our citizens are concerned, so I earnestly recommend the replacement of this apparatus by a modern motorized truck.

An inventory of equipment and supplies on hand shows a total of \$45,746.40.

The disbursements for the year were as follows:

Pay roll	\$23,263 78
New equipment	1,104 76
Repairs and supplies	167 78
Auto. repairs and supplies	491 73
Fuel	752 06
Light and power	404 75
Telephone and laundry	174 50
Insurance	220 00
Sundries	108 61
Rent, Station No. 2, 2 years	36 00
Commissioner's salary	100 00
	<hr/>
	\$26,823 97

POLICE DEPARTMENT

The Police Department is composed of the Chief of Police, eleven patrolmen and a number of special officers, one of whom is working full time.

There were 281 arrests made during the year, 134 for intoxication, 46 for breach of peace or larceny, 38 for violation of auto regulations, 19 for violation of liquor laws, and 44 for all other offences.

Four hundred and twenty-four people were given lodging, the largest number during the month of March, 71.

Five hundred and eight people were notified during the year of violation of auto parking regulations or defective lights.

During the year the patrolmen found 69 places of business unlocked during the night and the owners were notified.

The motorcycle, which has been used very effectively by the department for the past three years, has about reached its limit, and I would recommend the purchase of a car to be used by this department.

The traffic signals in use on our street corners in the past, while effective to a certain extent, are crude and unsightly and should be replaced with signals more in keeping with a city the size and importance of Rutland, and I would recommend the installation of at least two during this year, and adding others as soon as possible.

Our city has been unusually free from any serious crime during the past year, but with the increasing number of automobiles in use, the department has been taxed to its fullest extent.

An inventory of property and supplies on hand totals \$6,077 00.

The disbursements for the year are as follows:

Pay roll	\$21,313 85
Repairs and supplies	308 16
Traffic signals and maintenance	757 64
New equipment	228 88
Motorcycle account	373 91
Laundry and telephone	60 93
Commissioner's salary	100 00
	<hr/>
	\$22,143 37

Respectfully submitted,

FRED C. ROBERTS,

Commissioner of Public Safety.

Report of City Attorney

January 4, 1926.

To the Honorable City Council:

I herewith submit my report as City Attorney for the year ending December 31, 1925.

There have been no suits brought during the past year either for or against the City. I have co-operated with the Tax Collector in the collection of taxes from delinquents, and was present on behalf of the City on two occasions of hearings before the Public Service Commission in the matter of bus petitions.

During the year, several insane paupers have been removed to the Brattleboro Retreat, through the efforts of the Overseer of the Poor and the City Attorney, and the City relieved from further liability for their support and care.

At the October term of the Supreme Court an opinion was handed down in the suit brought by John F. Smith against the City of Rutland to recover for the board and lodging of two men committed to the Rutland County Jail; the decision of the Lower Court was reversed and the cause remanded.

During the last two weeks of November and the first week of December the City Attorney represented the City of Rutland at the hearings held in Montpelier before the Public Service Commission on the petition of the New England Telephone and Telegraph Company for increased rates. During this time the Telephone Company presented its case, and the case for the people is now being prepared jointly by the Attorney General of the State of Vermont, the Burlington City Attorney and your City Attorney. It is expected that the hearings will be resumed

the latter part of January or the first of February, when the people's side of the case will be presented.

Throughout the year, it has been a pleasure for the City Attorney to advise various members and committees of the Board of Aldermen and officers of the City.

Respectfully submitted,

J. A. CROWLEY,
City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I herewith submit my report as Overseer of the Poor for the year ending December 31, 1925.

Appropriation	\$9,000 00

Poultry houses	10
Additions to poultry houses	1
Barns	1
Sheds	11
Repair sheds	1

Respectfully submitted,

CHARLES G. NOYES,
Inspector of Buildings.

Report of Health Officer

Rutland, Vt., January 9, 1926.

To the Honorable City Council:

I submit the following report for the year ending December 31, 1925:

Contagious and Infectious Diseases reported:

Chicken Pox	114
Whooping Cough	124
Measles	10
German Measles	29
Diphtheria	23
Scarlet Fever	19
Mumps	67
Pneumonia	16
Typhoid Fever	2
Influenza	1
Poliomyelitis	1
Erysipelas	4

Total	410
Inspections of Plumbing	25

WATER

I have sent to the Laboratory at Burlington daily samples, except Sundays, and have found the water in excellent condition. Reports for same can be seen by all who so desire by going to the City Clerk's Office.

MILK

There have been 77 samples taken and would say that the milk more than averages with that of other places, as all samples have gone beyond the test called for. Several samples are reported as "Slight amount of visible dirt" which is due to carelessness that could be avoided and make a splendid record.

Respectfully submitted,

GEO. RUSTEDT, M.D.

Health Officer.

Report of Department of Public Health

Statistics for 1925 compiled from certificates filed in the City Clerk's office.

Report of City Weigher

To the Honorable City Council:

I respectfully submit the following statement of weighing done on the City scale during the year 1925.

Paid the City Treasurer for 1,925 weights \$192 50

Weighing fees 96 25

Net \$96 25

Number of loads of coal, etc., weighed for the school buildings and City Hall free of charge 157

Total number of weights 2,082

Respectfully submitted,

H. B. WHITTIER,
City Weigher.

Report of Rutland Hospital

Statement of the number of patients cared for at the Rutland Hospital during the year 1925 and the total expense of the service, as shown by reports made to the City Council.

Total number of patients for the year	75
Board and care	\$6,230 95
Operating room	252 00
Medicine and supplies	149 64
X-ray service	190 00
Laboratory service	299 00
Paid physician (not included in above)	40 00
Total expense	<u>\$7,161 59</u>

Four patients in hospital under treatment January 1 1926.

Report of Librarian

To the Officers and Members of the Rutland Free Library Association:

The fortieth annual report is herewith respectfully submitted:

Number of volumes in the Library February 1, 1925..	26,767
Increase by purchase	462
Increase by gift	55
Increase by binding periodicals	87
Books added from duplicate pay collection ..	93
	<u>697</u>
	27,464
Number of volumes withdrawn	96
Number of volumes in the Library February 1, 1926	27,368
Number of volumes rebound, 1925	284
Number of volumes replaced	176
Circulation of books, 1925	78,201
Circulation of books, 1924	77,210
Increase in circulation for 1925	991
Circulation of foreign books	180
Circulation of volumes of music	93
Number of new cards issued, 1925	803
Number of new cards issued to children, 1925	396
Number of books drawn on teachers' cards during 1925	12,341
Number of books drawn on club, subscription and special cards for ministers, editors, etc.	8,695

Number of volumes drawn by children, 1925	22,065
Number of volumes drawn by children, 1924	21,252
Increase for 1925	813
School circulation, 1925	1,394
Number of teachers' cards in use, 1925	179
Number of subscription cards in use, 1925	51
Number of volumes repaired at Library, 1925	550
Number of days the Library has been open, 1925	302
Largest daily delivery, February 28, 1925	604
Smallest daily delivery, September 10, 1925	40
Average daily delivery	259
Average monthly delivery	6,517
Amount received from fines	\$402 91
Amount received from Association fees	94 00
Amount received from subscriptions	46 50
Total	\$543 41
Number of periodicals subscribed for during 1925 ..	69
Number of periodicals received by gifts, 1925	62
Total	131

IRENE R. CONNER,
Librarian.

Report of Library Treasurer

To the Officers and Members of the Rutland Free Library Association:

I herewith submit my annual report for the year from February, 1925, to February, 1926.

RECEIPTS

Balance on hand February, 1925	\$1,153 66
Appropriation from City	\$5,500 00
Appropriation from Town	200 00
Fines and subscriptions.....	449 41
Association fees	94 00
Tabard Inn (book acct.)	210 47
Interest from trust funds (book acct.)..	46 21
Interest from Cramton-Cutts fund (gen. acct.)	200 00
Proceeds from Garden Party	249 50
Gifts from Clubs	55 00
Other gifts	5 00
Total receipts	7,009 59
Total receipts	\$8,163 25

DISBURSEMENTS

Books and magazines	\$1,421 18

	<hr/>	\$12,868 17
Interest transfered to general account	200 00	
	<hr/>	
Amount of fund to date		\$12,668 17

ELLEN B. CRAMTON,
Treasurer.

I have examined the above accounts and find them correct
as stated.

CORNELIA C. PERKINS,
Auditor.

Report of the Board of School Commissioners

To the Mayor, City Council and Citizens of the City of Rutland:

The Board of School Commissioners herewith submits its report for the fiscal year ending December 31, 1925.

We are pleased to report the completion of a year of orderly progress and real achievement in the schools under our direction. From our point of view it is to be regretted that the proposal for a new high school building was defeated last January. We still believe that the present congestion in the High School prevents the pupils from receiving the training which they have a right to expect from the city. We accept the decision of the voters, however, and hope in due time to submit a proposition which will meet with general approval.

When our budget was prepared in December, 1924, for the fiscal year 1925 we thought it would be necessary to have a tax of 25 cents on the dollar of the grand list in addition to the 85 cents which the City Council can levy under the Charter. Later estimates indicated that the schools could be operated on an additional tax of 20 cents on the dollar of the grand list, and that is all that was asked for. We have been able to close our books this year with a small balance on hand because strict economy has been practiced, certain very desirable enterprises have been postponed, some anticipated expenses did not become necessary and a small increase in the grand list gave a larger income than was expected.

We are fully aware that the Public Schools of this city belong to the people who have a right to determine final policies. We are a committee of citizens elected to carry out the will of the citizens with respect to their schools. In our opinion there

is no great desire to increase the appropriation for school purposes at the present time. We propose, therefore, to run the schools for the year 1926 on the same tax on the dollar of the grand list as in 1925. It should be fully understood, however, that to do this it will be necessary for us to neglect in some measure our duty toward the children of Rutland.

In spite of certain financial limitations your Board has been able to continue its policy of repairing completely one building each year. For some years we have had difficulty in keeping the Lincoln building warm in extreme weather on account of the inadequacy of the heating system. A built-in metal gutter which had rusted out made necessary extensive repairs on the roof and since this building had not been painted and redecorated since 1913 it seemed desirable to do a complete job there in the summer of 1925. Our expenditure on this building was as follows:

Interior decoration and outside painting	\$2,027 65
Heating system, additional radiation, increased size of piping and labor	1,192 53
Metal weather strips on four north rooms	181 84
New shades	99 96
Electrical work, new wiring and new fixtures	375 00
Repairs to roof	1,243 56
Cartage	21 00
Total	\$5,141 54

We propose to continue the program, in the summer of 1926, by repairing the Watkins Avenue building, which has had no thorough repair in twenty years. The furnace which heats the corridors has been worn out for a long time, so much so that water freezes in drinking fountains and in the two toilets. Sound economy dictates that we take a dead boiler from the Lincoln school and put it in the place of this worn out furnace. Our plan is as follows:

1. Painting of outside woodwork.
2. Redecoration of the interior.

3. Improvement of the heating system.
4. Minor changes in the basement.
5. Additional wiring and electrical fixtures.
6. Outside grading and cement work.
7. Other minor repairs.

Last October we were confronted with the possibility of an epidemic of diphtheria among the school children, creating a situation which made it necessary to employ an advising physician to work with our school nurse. Measures for the immediate relief of the situation were so complete and successful that within a month or so all danger of an epidemic seemed to be past. Acting on the advice of our medical department, the local department of health and the state department we decided to make use of the Schick Test and to administer toxin anti-toxin to the school pupils whose parents desired it. This treatment improves the resistance against diphtheria to such an extent that they are not likely to contract the disease now or later.

Total number of Schick Tests given	411
Total number treated with toxin anti-toxin	279
Number still to be treated	80

Reports from several New England cities where the Schick Test has been in use for four or five years indicate that those communities are practically free from diphtheria among school children while other cities which have failed to take these precautionary measures are subject to epidemics of the disease.

Out of sixty-five cases reported from one New England city forty-five were found to be "carriers," i. e., persons having active diphtheria germs in their throats but not themselves ill. The cases which developed in Rutland last fall were probably caused by such carriers. The evidence seems to indicate that if all the children entering the schools of Rutland for the first time were immunized, the danger of a diphtheria epidemic would be eliminated in a few years.

BOARD OF SCHOOL COMMISSIONERS,
By Lathrop H. Baldwin, President.

Report of the Superintendent of Schools

*To the Board of School Commissioners, the Mayor, City Council
and Citizens of the City of Rutland:*

I have the honor of submitting to you the thirty-third annual report of the Rutland City Schools and the fifth under the present administration.

My report this year will deal with two subjects: the length of the school day and time allotment to subjects.

LENGTH OF SCHOOL DAY

In considering the length of the school day there is only one factor of great importance and that is the amount of time a child can spend in school to advantage, keeping in mind the laws and needs of physical and spiritual growth as well as the claims of other agencies of education. A school system with a well developed program of physical education and industrial training may be expected to use more minutes a week of a child's time with profit, than a school system lacking these activities.

The traditional school day was of six hours or 1,800 minutes a week for all children large and small. For what appeared to be valid reasons, this has been shortened from time to time until now the average for grades 1 to 6 for sixty leading cities of the United States is 1,490 minutes, while the average for eight cities and villages of Vermont is 1,457 minutes, and for Rutland, 1,450.

LENGTH OF SCHOOL DAY IN CERTAIN CITIES AND VILLAGES OF VERMONT

Total number of minutes per week devoted to school work

Grade Place	1	2	3	4	5	6	Recess
Barre.....	1350	1380	1380	1410	1410	1410	15 min a. m.—15 min p. m.
Bennington.....	1150	1250	1350	1500	1550	1600	15 min a. m.—15 min. p. m.
Brandon.....	1250	1300	1350	1400	1450	1500	15 min. a. m.—5 min. p. m.
Brattleboro.....	1350	1425	1500	1500	1500	1500	15 min. a. m. Grades 1-3 15 min. p. m.
Burlington.....	1450	1475	1600	1600	1600	1600	15 min. a. m.—10 min. p. m.
Montpelier.....	1350	1350	1500	1650	1650	1650	15 min. a. m.—15 min. p. m.
Proctor.....	875	1500	1500	1500	1500	1600	15 min. a. m. and p. m. Grades 1-3 10 min.
Rutland.....	1350	1350	1500	1500	1500	1500	15 min. a. m.—15 min. p. m. for Grades 1-2

Time given to Recess, Physical Education and Manual Training or Domestic Science, included.

Bennington, Brandon, Brattleboro, Burlington, Proctor and Rutland give from 50 to 100 min. per week to Physical Education.

Montpelier devotes 60 min. a day to Physical Education and 60 min. a day to Manual Training.

Proctor has a short session in Grade 1 because the schools are crowded and this grade is on part time.

ANNUAL REPORT

CITY OF RUTLAND

The teachers in the six elementary schools of Rutland believe that the school day should not be lengthened, basing their position on the fact that the children need the balance of the time now at their disposal for free play and physical recuperation. It is certain that the lack of flexibility of school equipment and school programs is exceedingly irksome to growing and active children. The half hour from 3.30 to 4 o'clock is generally used by the teacher for assisting pupils whose pace is naturally slow or who have failed to keep up with the class on account of sickness or other cause. In this connection it is interesting to note that some physicians and psychologists, who have made a study of the laws of physical and mental growth of children, are advocates of an even shorter school day.

The school day and the school year in densely populated areas may well be longer than in areas where there is ample opportunity for free play. In Rutland we have a large amount of play space and many organizations which minister to the needs of our children for physical growth and development. Since the school is only one of the agencies for the education of the young, wisdom would urge a consideration of the claims of his other activities on a child's time. There is evidence of a keen competition for the free time of children, so much so, that the home, which has a right to expect certain little services, is left out of account.

TIME ALLOTTED TO ELEMENTARY SCHOOL SUBJECTS

There was a time, many years ago, when the major portion of the time of a long school day was devoted to the three R's or the so-called fundamentals. Those who live in the past surround these ancient schools with a glamour and a virtue they never possessed. Reports and other accounts of the schools of two, three or four generations ago are filled with records of their shortcomings. The extracts, quoted below, from the reports of school committees for 1856 in a neighboring state, are illuminating.

"We have noticed in most of the schools, the past year, an evil connected with the instruction in reading. Too many pages have been read. No more chapters should be read than can be read well, even if a class does not go half way through the book."

"In reference to the studies pursued in the schools, your Committee would remark that but little attention is paid to *penmanship*, and very little improvement is manifest in this important branch. As a general thing, the writing is very poor, and does not by any means compare with the general condition of this art in former years."

"Among the many evils resulting from the fast spirit of the age, is its effect on our common schools. Scholars cannot spend time for study, and they expect the teacher to do it for them."

"With much regret, the Committee have to report four or five lads leaving school No. 3, because debarred from chewing tobacco, and spitting in the house, in school hours."

The percentage of time per week allotted to groups of subjects at the present time is about as follows:

The three R's, including language, reading, spelling, writing and arithmetic	50%
Additional fundamentals, including history, civics, geography and science	15%
Special subjects, including hygiene, physical training, play, recess, drawing, music, opening exercises and miscellaneous	35%

There is plenty of evidence to prove that the three R's are better taught now than they were when all the time was given to them.

Time Allotment in Minutes per Week for Subjects and Activities found in Grades 1 to 6 in the Elementary Schools of Sixty Cities of the United States and in Rutland.

TABLE II.

From Fred C. Ayer, Studies in Administrative Research.

It may be contended that the decrease in time devoted to reading, arithmetic and language during the last twenty years is a tendency in the wrong direction. The reply to this contention is, that the neglect is only apparent and by no means real. The time devoted to the social studies is to a considerable extent silent reading of the best type, while the material found in these same subjects and others furnishes the occasion for spirited discussion which makes oral English more real. In arithmetic the time is saved by the elimination of processes which serve no social purpose and by improved methods which make for accuracy with the use of a minimum of time.

At the present time much of the elementary school procedure is under fire. Efforts are being made the country over to determine what activities and habits and attitudes have social significance and then decide what processes or subjects or situations will best develop the qualities which shall be most useful in determining the individual contribution to the welfare of the race.

Mr. William H. Kilpatrick says, "Mere conventional and traditional learning, however deeply intrenched in public esteem, must give way to really educative experiences. Everything accepted into the curriculum must be really practical, that is influencing life for good. Especially the new school must really build moral character. This can be done. It must be done. So the new curriculum will be no narrow or one-sided affair. The substance of the three R's will be the main objectives, the enrichment of child life and through it the enrichment of adolescent life and through it the enrichment of adult life—one continuous process."

Statistical Report of the Rutland Public Schools

FINANCIAL STATEMENT FOR THE FISCAL YEAR ENDING
DECEMBER 31, 1925

Receipts

Balance on hand January 1, 1925	\$41 90
Appropriation, 105% Grand List	136,968 02
Tuition	7,187 96
Books	2,054 02
Incidentals	546 13
State rebate, superintendent of schools	2,000 00
State rebate, vocational training	200 00
State rebate, current expenses	242 76
State rebate, transportation	18 96

\$149,259 75

Report of Auditors

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, and Sinking Fund Commissioners from January 1, 1925, to December 31, 1925, inclusive, and find they have duly accounted for all monies received by them and that they have proper vouchers for all monies expended.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the City Treasurer's books. We have checked the cash and verified the notes, bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners, and found them to be correct.

The Treasurer's book shows a balance of uncollected taxes as follows:

1904, 7, 8, 12, 13, 17, 18, 19, 20	\$605 46
1921	387 13
1922	225 45
1923	550 48
1924	1,306 54
1925	3,070 80
	<hr/>
	\$6,145 86

The books and records of the City Treasurer's office are in excellent shape and very clearly show the city's true condition.

Respectfully submitted,

ROBERT D. SMITH,
HORACE A. COLBURN,
WILLIAM T. SIMONDS,
City Auditors.
